

Introducing:

Tray-Tag™

**There are no more “guesstimates.”
What goes in first...what comes out first!
Who gets what...What is this?**

Information is a key to success, without information decisions suffer.

Tray-Tags remove the ambiguity that comes from insufficient information.

Tray-Tags allow food-service managers to make better decisions because they are based on accurate information.

- Designed by a restaurateur for his restaurant
- Easy to put on and they stay there until you remove them
- Comes with a wet-erase marker or use your own labels
- Freezer, refrigerator and holding oven safe
- Warming oven safe up to 93°C or 200°F.
- Dishwasher safe
- Avoid cross contamination
- Manage food allergies safely

Tray-Tags are made from food-grade, dishwasher-proof plastic and allow all current kitchen and preparation activities to continue just as they do now, but with more efficiency and insight.

Trays are still stackable and refrigerators, warming ovens, walk-ins and other storage and movement activities are not affected.

You save time and money, your customers stay safe and receive better service. Your work flow and your employees are better informed.

(more details on reverse side)

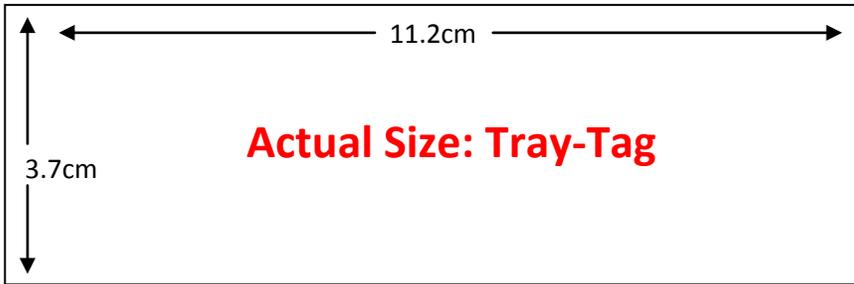

**TAG IT!
MARK IT!
FOOD LABELING WAS NEVER THIS EASY!**

Tray-Tags attach securely, they must be physically removed, they allow trays to lay flat on the counter and to remain stackable.

Tray-Tags ensure food safety by:

- Ensuring the operator meets health code standards
- Ensuring proper food rotation
- Labeling trays with dates and times
- Allowing clear written cooking instructions
- Labeling "Use By" dates
